

### Heavy Duty Ceramic Carbide

An abrasion resistant metal repair compound for equipment subject to heavy wear.

#### Features & Benefits:

- High abrasion resistance - ideal for protection from slurries and dry powders
- Reinforced with ceramic and carbide particles
- Excellent erosion and corrosion resistance
- Applied by spatula or trowel
- Optimum physical & mechanical strength

#### Application Uses:

Chutes • Hoppers • Pipe Elbows • Valves  
Pumps • Equipment subject to aggressive attack from dry solids and slurries

### Ceramic Carbide 88

A ceramic enhanced epoxy lining system for equipment in fluid flow environments.

#### Features & Benefits:

- Ideal for spray application
- Protection from low particulate liquids and chemicals
- For use on chemical tanks, pumps and valves
- Excellent abrasion resistance
- Optimum erosion and corrosion resistance

#### Application Uses:

Pumps • Valves • Pipes  
Risers • Tanks • Pipe Elbows

OUR LOCAL DISTRIBUTOR IS:

### *Hycote 175*

*A solvent free epoxy coating for use, where exceptional resistance to chemical attack is required.*

### Features & Benefits:

- **Ultimate in solvent free, epoxy chemical resistance**
- **Suitable for continuous immersion in most chemicals**
- **Unaffected by high temperatures**
- **Excellent adhesion to steel and concrete**
- **Good abrasion and impact resistance**

### Application Uses:

Tanks • Pipework • Containment Dykes  
Bund Areas • De-sulphurisation Units
